MISSION

THE SCHOOL OF SCIENCES offers programs leading to Bachelor of Science degrees in Biology, Chemistry, Computer Science, Mathematics, Natural Science, Physics, and Engineering Physics, as well as a Bachelor of Arts degree in Mathematics. Students seeking to enter schools of medicine, dentistry, pharmacy or any health related professional school traditionally enroll in the School of Sciences. The baccalaureate degrees in Biology and Chemistry are designed to meet the entrance requirements of all health related professional schools.

The course of study for each degree program is designed to meet these criteria:

1. Critical thinking, an active, purposeful, organized and disciplined effort to make sense out of our world and our lives, is the essential foundation of lifelong learning.
2. The knowledge bases and skills needed to deal effectively with the challenge of living in contemporary society are multidisciplinary.
3. A person should be able to make personal and professional decisions within religious and ethical contexts.

The degree programs are constructed to produce graduates who will be able to excel as professionals in science, who will succeed in pursuing further education in graduate or professional schools, and who will use their science background as a foundation for careers in other areas such as business, law, education, and engineering.

DEGREE REQUIREMENTS

In order to graduate, a student must complete 122 semester credit hours with an overall grade point average of 2.0 or above and a minimum 2.0 grade point average in the satisfaction of major requirements. In addition, every student must satisfy the requirements of 6 hours in English composition; a minimum of 18 hours in humanities/social science that must include at least 3 hours in literature, 6 hours in religious studies, 3 hours in moral values course work, and 6 hours in the social sciences; and 2 hours in Business/Technology. All Math and Natural Science requirements, and sometimes some of the other above requirements, are already specified for the majors in Science. Details on permitted or recommended courses can be found in the General Education section of this catalog.

Transfer students must take at least one half of the required mathematics courses numbered above 300 at Christian Brothers University.

¹ Science electives must include at least 8 hours in one of Biology, Chemistry, or Physics outside the area chosen for the minor.

² Students who will take CS 122 should take CS 109. If a 2 credit engineering course is taken, add an additional credit to free electives.

³ Minor electives must be chosen to obtain a minor in one of Biology, Chemistry, Computer Science, or Physics. Credits necessary for the minor vary with the requirements for that minor. Reduce free electives by the difference of those credits required by the chosen minor and those listed as minor elective credits in this paradigm.

⁴ The Mathematics electives must be chosen from MATH 301, 308, 309, 329, 405, or 470-479.

⁵ CS 122 and ECE 112 are the same subject. If CS 122 is chosen, reduce free electives by 1 credit.

⁶ Must satisfy moral values requirement.
