QUIZ 1

Name _____

1. Scott and Greg were asked to add two whole numbers. Instead of following instructions Scott subtracted the two numbers (instead of adding) and obtained an answer of 10 while Greg multiplied the two numbers (instead of adding) and obtained an answer of 651. What were the two numbers they were given?

2. Carol bought some items at variety store. All the items were the same price, and she bought as many items as the price of each item in cents. (For example, if the items cost 10 cents, she would have bought 10 of the items.) Her bill was $2.25. How many items did Carol buy?

3. Using a 5-minute and an 8-minute hourglass timer, how can you measure one minute?
