

QUIZ 4

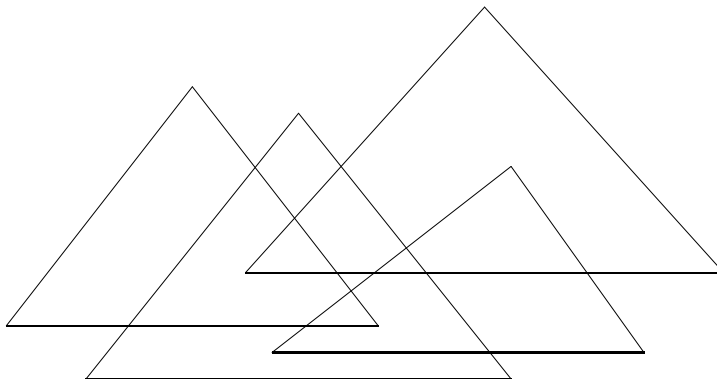

Name _____

1. Below are a list of names and the shapes they describe. Put the letter next to the name inside the appropriate shape.

- (a) Isosceles Triangle
- (b) Square
- (c) Kite
- (d) Isosceles Trapezoid
- (e) Non-Isosceles Trapezoid
- (f) Right Triangle
- (g) Rectangle which is not a Square

2. How many triangles (of any type or size) exist in the following design.

3. On the grid below you should see a line segment. Draw a parallelogram onto the grid, where the parallelogram is not a rhombus and not a rectangle, using the line segment as one side of the rhombus.
